

Contact Lens Evaluation Policy

Thank you for choosing STL Vision for your contact lens needs. Contact lens evaluations require additional testing and monitoring beyond what is done during a routine eye exam. Evaluations may include: checking an over-refraction, contact lens calculations, corneal topography, and microscopic examination of the fit and movement of the lens. Contact lenses are medical devices that require ongoing care. Contact lenses are considered an elective product beyond a normal eye exam. Your insurance may or may not pay for any part of an exam pertaining to contact lenses.

The use of contact lenses is not without potential risk. Although rare, contact lens wearers are at risk for non-sight threatening problems, and permanent, sight-threatening complications such as infection. These risks are significantly higher in patients electing to wear lenses on a continuous, overnight or extended basis, and for those who do not follow care guidelines. At a minimum, your contact lenses must be evaluated by a doctor on a yearly basis in order to refill or update your prescription. It is our commitment to provide the best possible care and service for your contact lens needs.

Contact lens evaluation fee schedule
